

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning on line 5 of page 5 as follows:

β1
Step 16 follows step 15, and in this step, the location of each of the vehicles 111 is stored within a computer system ~~[[26]]~~ 126. This step 16 may be accomplished by placing a unique and selectively readable identification number on and/or within each tag assembly 113 and separately interrogating each tag assembly 113 as the vehicles 111 respectively enter the yard or facility 119 and/or when they are stored at a certain respective initial location. In this manner, the respective identifying vehicle numbers and respective vehicle locations are obtained and placed within a computer database which may be contained within computer 126. Hence, each received vehicle 111 together with its respective initially stored location is contained within computer 126.
